RAJ COLACO

SOFTWARE DEVELOPER | C# / .NET | ANGULAR | AI-ASSISTED DEVELOPMENT

Vasai West, Maharashtra • +91 9673179079 • raj45colaco@gmail.com

GitHub • Portfolio

PROFESSIONAL SUMMARY

Software developer with 4+ years of experience across enterprise application development, backend services, workflow automation, and developer tools. Currently developing applications for Deloitte using C#/.NET and Angular, with GitHub Copilot supporting an AI-assisted development workflow. Previous experience includes data-processing pipelines, rule-based systems, and cloud-backed services.

PROFESSIONAL EXPERIENCE

Software Developer | Deloitte projects

- Develop enterprise applications using C#/.NET and Angular, using GitHub Copilot to accelerate implementation and iterative feature development.
- Work across frontend and backend application layers to deliver application features.

Core Engineering – Web Developer | FlexiLoans

- Built backend pipelines to parse, normalize, and validate financial data extracted from bank-statement PDFs for lending workflows.
- Implemented rule-based processing, data aggregation, configurable forms, and role-based configuration frameworks to streamline operations.
- Managed backend services and data storage using AWS S3 and CloudWatch; improved operational troubleshooting with user-facing error messaging.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET, Angular, TypeScript, JavaScript, Python, Node.js, FastAPI | **Data:** SQL, MongoDB, Redis | **Cloud & Tools:** AWS S3, CloudWatch, Jenkins, Datadog, Jira, GitHub Copilot

SELECTED PROJECTS

SQL Query Optimizer: Developer tool for SQL query analysis, performance insights, index recommendations, and anti-pattern detection.

RegexDev: Interactive regex tester and debugger with syntax highlighting and visual pattern explanation.

FaithQuest: Browser-based location-aware game featuring interactive maps, proximity-based exploration, and puzzle progression.

ResumeMind.AI: AI resume builder that parses PDF/DOCX/TXT resumes, analyzes GitHub profiles and job descriptions, scores ATS compatibility, and generates job-targeted resumes with PDF/DOCX export (React, TypeScript, Gemini API).

OpportunityAI: Web platform that uses OpenAI and Claude APIs to generate AI project opportunities, scoring them across eight dimensions with market-signal tracking and side-by-side comparison (React, TypeScript, Zod).

HHJudgeAI: Multi-agent system that evaluates AI projects from a live demo link and a GitHub repo, using five judge personas, a deliberation loop, a 100-point verdict, and a defense Q&A simulation (React, TypeScript).

EDUCATION & ACHIEVEMENTS

B.E., Fr. Conceicao Rodriguez College of Engineering, 2018–2022 • Recognition: Two-time Employee of the Month at FlexiLoans • Certification: Python (Basics), HackerRank
